

PARIS WILL SPEND WINTER IN COMFORT

ASSURANCE OF FULL SUPPLY OF
FUEL FOR THE FRENCH
METROPOLIS

(By Associated Press.)

PARIS, Nov. 11.—Paris is in no danger of shivering this winter though it will have to pay rather dearly for its warmth. Monsieur Marcel Sembat, minister of public works, assures the public that there will be plenty of coal available and supports his views with a few conclusive statistics.

France consumed 60 million tons of coal a year before the war; 10 million tons of it came from Great Britain and 10 million from Belgium and Germany. The latter markets are closed to her now but her consumption has decreased from 60 million to 40 million tons by reason of the German occupation of the industrial regions of the north and east. Her coal production has diminished in the same ratio, being 20 million tons as against 40 million tons, so she has to depend on Great Britain and the United States for the 20 million tons that she lacks. The receipts at French ports, which were less than a million tons a month a year ago, rose to 1,800,000 tons in August. Statistics of subsequent receipts are incomplete but it is thought that they exceed two million tons per month, sufficient to meet current demands and accumulate a small surplus.

Coal prices have shown no response to the increased receipts. The best qualities are firm at \$20 a ton delivered at domicile while inferior grades and industrial coal bring \$15 a ton. The city gas company, profiting from these high prices, has supplanted coal with gas in a great many families, furnishing the heaters free of rental.

PUSHING OPERATIONS ON THE NEVADA ORE

In the Acme section, north of Luning, Manager Hill is pushing work on the holdings of the Nevada Ore and Copper company. The working shaft on the big copper estate is being sunk to an additional depth of 200 feet and when this is completed the work of crosscutting to the ledge will be started. The principal stockholders of the company are located in Iowa and Minnesota. J. A. Wright of Minneapolis being general manager, and they are of the class that will make good.

Some time ago Mr. Hill sold a gold property to these people and has been carrying forward development on it by driving a tunnel which is now in 130 feet. Drifts and other workings have opened up good ore bodies. It is reported that a 4-foot vein has been opened and tests as to its values are being made with a view to the installation of a stamp mill to treat the output. The ledge cut can be traced on the surface for over 3000 feet. The property is looking fine, and under the personal and efficient supervision of Manager Hill the money for development is going into the ground in a manner that is sure to get results that are satisfactory.—Western Nevada Miner.

HOBBO ARMY TO CROSS STATE

According to Constable Scott Butler of Gerlach, an army of hoboes is waiting at Big Bar, Cal., for an opportune moment to make their way across the state line and will land in the vicinity of Gerlach.

Constable Butler says the hoboes, most of them members of the I. W. W., are all ready to move and he believes contemplate beating their way east before winter sets in. He asks the Washoe county commissioners to take some steps toward providing him with a deputy to cope with the hoboes when they start their move.—Star.

NEW STRIKE IN LINCOLN COUNTY

Oak Spring located about 18 miles east of Panaca and 8 miles from the main line of the Salt Lake Route, is the scene of the latest Nevada gold strike. Just how important the new find will prove to be is only conjecture. However, the past few days there has been a rush to Oak Springs and claims have been located by the score by bonanza seekers. Many have gone from Pioche, Panaca and Caliente.—Pioche Record.

RECEPTION TENDERED JOCKEY

Jockey Burns, the famous Wingfield rider, was recently, tendered a farewell reception at Reno. The popular rider leaves in the near future with a string of 32 racing horses for the Wingfield stables at New Orleans. He predicts that the Reno horses will command the attention of the eastern circuit.

DR. WARD SEES A GREAT FUTURE FOR TONOPAH

(Continued from page 1.)

edge of enrichment, but everything in the face shows firmness and value and continuity.

"You ask: 'Do you consider the Tonopah Extension Mining company the trail breaker toward the west beneath the sand and sagebrush, where there are no obvious evidences of continuation of the ore zone?' I don't like to answer such a question, but will say that we are driving out to the westward under the wash and the deposit of erosion, where the surface displays no mineralization, and we are finding ore at the depths.

"We have opened up the North Merger vein in the Victor, which is developing favorably and we hope that the next two or three months will show the Murry vein opened on the 1540 level and thus prove its continuation from the 1350 level. This will give us the vein on its dip at a point 250 feet below where it was previously encountered. If the continuance of this ore measure is proven at this depth, we have every reason to believe that it will increase the ore reserves materially and if the silver conditions continue to improve, we expect to strike a different pace and increase our milling capacity accordingly.

"The net earnings for the Tonopah Extension Mining company for the month of October were in excess of \$65,000, which is largely attributable

to the increase of our lower ore measures and advancement in the price of silver.

"The absorption of the Merger and Victor companies by the Tonopah Extension Mining company is one of the best indices of the plans for the development of the enlarged estate.

"Our first purpose was the elimination of litigation, securing more economical operation of the properties and the advantage that the Victor shaft would give for the development of the three properties.

"We are in favor, I may say, of the establishment of vertical boundary lines and are in favor of amicable relationships between ourselves and the other operating mining companies in our immediate vicinity. We sympathize with efforts that are being put forth to abolish extra-lateral rights, realizing that the conditions imposed by the old federal law do not have any bearing upon a district such as this and were not so contemplated. This is not a district where nature stands forth gaunt and bare, with the apices of its ledges frowning forth, but they are buried deeply under the debris that came through volcanic action and erosion. Here we do not have the croppings extending along gaunt, scarred hillsides, as was the case on the Comstock, but they are deeply buried by the lava, the detritus of erosion and the swales of sand

swept hither and yon by the winds.

"It is not possible to go out and knock off a fragment of rock, inspect the character of the formation and then locate 1500 feet along the center of the ledge. The ore measures must be sought out through traversing the underworld, at great cost and with limited chances of success. We think that the people who seek out the lenses of ore are entitled to them if they lie within their vertical lines, but otherwise they are the property of the people who have taken up the surface rights that are claimed, and that they should be largely if not entirely determined by means of vertical lines, but I am speaking more in an academic than in a practical frame of mind, and with corresponding language.

"Our company is in favor of making its disbursements of profits to its shareholders, instead of expending them in needless and in endless litigation."

Dr. Ward came to Tonopah in 1902 and has ever since that time been most prominently identified with many of its most progressive efforts. He feels greatly enthused over the acquisition of the Victor and Merger by the Extension, as this gives a great territory that may be developed most thoroughly, without the internecine strife that usually occur when neighboring properties are developing along the same lines and with consequent friction.

"QUALITY FIRST" IS WHAT COUNTS

When President H. S. Firestone of the Firestone Tire & Rubber company was asked concerning the new additions to the big plant at Akron, Ohio, he replied, "Our growth, no doubt, seems remarkable, but more than any other force our rigid insistence on 'Quality First' in everything connected with the manufacture of our tires is responsible for our vast volume of business.

"We make the very best tire we know how. The best brains, the finest materials, the most painstaking efforts and the utmost care are used in producing Firestones. The one idea of quality is uppermost both in the factory and in the many places that offer Firestone service.

"Naturally, the public is a factor in our increase, for motorists use Firestones and realize that quality is their foremost feature. The result is more orders and the factory grows that it

OBJECTION SUSTAINED

The objection was sustained and the motion denied by Judge Averill in the fifth judicial district court this morning in the case of Rudolph Wurliker company against J. P. Kelly. This was a ruling on a motion to strike out the cost bill. The ground of the motion was that the bill was not filed in time.

NUMEROUS MURDERS

A Chinaman was found murdered at the McIntyre ranch, near Halleck, last Sunday night, being the fourth murder in Elko county since July. So far the officers have been unable to find any clue to this last murder.

may keep up with this demand—a logical outcome, and one of which we are justly proud, for our plant is the world's largest tire concern. Quantity in production is excellent but when quality goes hand in hand with quantity, there is your ideal combination. We feel very much gratified in feeling that we are in possession of that combination."

OPERATIONS STARTED

ON RAWHIDE REGENT

J. H. Miller and J. E. Adams made a trip by auto to Rawhide this week to start up extensive operations on the Regent mine in that camp, in which they are very heavily interested. For some time past big freighting teams have been hauling in mining machinery, equipment and supplies with which to operate the property. These have all been assembled on the ground and the work started that will give a new impetus to mining in the Rawhide district. Large ore bodies are already exposed in the workings but it needed heavier equipment to properly handle it. The Jesse Knight people of Utah are also interested in the holdings.—Western Nevada Miner.

EVERYBODY LAW ABIDING

Only two arrests were made last night and they were Indians possessed of a jag. It was one of the noisiest paynights of the year, yet there were no crimes committed, nor even any misdemeanors that could be traced to their source.

Our Job Printing Department

CAN SUPPLY YOUR WANTS

Loose Leaf work of every description. We have our own ruling machine and can furnish you promptly Ledgers, Cash Books, or any kind of record books, ruled to suit your requirements.

Book Binding—the kind that opens flat and wears for years—Special Ruled Blanks—just the way you want them.

Booklets and Folders.

Programs and By-Laws.

Invitations and Society Work of all kinds.

Besides the general run of printing you use every day.

Have excellent facilities, and the prices are right.
